

Celebrating 30 years at WCC

For 30 years, Dr. Cavender has practiced pediatrics at Wayzata Children's Clinic.

During his tenure, Dr. Cavender has provided exceptional quality care for thousands of children (and in many cases their children). As a parent and grandparent, he recognizes the importance of building a long-term relationship with patients and their families. He truly epitomizes what we value so highly here at the clinic, a passion for pediatrics, love of family and the absolute joy that comes from caring for and interacting with children.

Dr. Collins Cavender

Over the years, my biggest thrill has always been the interaction with children and their parents. Having lived in the community myself, I have enjoyed seeing the children grow and mature, be it in the exam room or the grocery aisle. I feel truly fortunate to have been a part of that and want to thank our exceptional staff here at Wayzata Children's Clinic for their support over the years.
